

LISTING OF CLAIMS:

Claims 1-61 CANCELED.

62. (PREVIOUSLY PRESENTED) Apparatus for playing a war game comprising:

- a clothing article constructed to be worn by a participant in said war game;
- a flexible display formed on said clothing article formed of a layer of a light emitting polymer and a fabric base, said flexible display having fabric-like characteristics to conform to the body of the participant like a fabric and arranged to display selectively one of a plurality of images;
- a controller generating signals for said display, said signals defining said images;
- a gun coupled to said controller, said gun generating a beam when activated by said participant; and
- a sensor mounted on said clothing article and coupled to said controller, said sensor detecting a hit from the gun of other participants;

wherein controller generates an indication corresponding said hit .

63-64. CANCELED.

66 (CURRENTLY AMENDED). The [[the]] apparatus of claim 62 wherein said electronic display includes a protective layer on top of said layer of light

emitting polymer material, said protective layer being made of one of a transparent and translucent material.

67 CANCELED.

68 (PREVIOUSLY PRESENTED). The apparatus of claim 62 wherein said sensor is disposed adjacent said flexible display.

69 (PREVIOUSLY PRESENTED). The apparatus of claim 68 wherein said sensor is surrounded by said flexible display.

70 (PREVIOUSLY PRESENTED). The apparatus of claim 62 further comprising a memory arranged to hold data associated with images, said controller being coupled to said memory to receive said data to generate said images on said flexible display.

71 (PREVIOUSLY PRESENTED). The apparatus of claim 62 wherein said flexible display is formed on a separate panel, said apparatus further comprising a securing member arranged to secure said panel to said clothing article.

72 (PREVIOUSLY PRESENTED). The apparatus of claim 62 wherein said flexible display is integrally incorporated into said clothing article.

73 (NEW). A clothing apparel:

a flexible display formed on said clothing apparel from a layer of a light emitting polymer and a fabric base, said flexible display having fabric-like characteristics to conform to the body of the participant like a fabric and arranged to display selectively one of a plurality of images; and

a controller generating signals for said display, said signals defining said images.

74. (NEW) The clothing apparel of claim 73 further comprising a memory arranged to hold data associated with images, said control member being coupled to said memory to receive said data to generate said electrical signals.

75. (NEW) The clothing apparel of claim 73 further comprising a securing member arranged to secure said panel on the body of said person.

76. (NEW) The clothing apparel of claim 73 wherein said electronic display is integrally incorporated into said panel.

77. (NEW) The clothing apparel of claim 73 wherein said electronic display is constructed to and arranged to show color images in response to said electrical signals.

78. (NEW) The clothing apparel of claim 73 wherein said control member generates electrical signals defining a static image on said electronic display.

79. (NEW) The clothing apparel of claim 73 wherein said control member generates electrical signals defining a dynamic image on said electronic display.

80. (NEW). The clothing apparel of claim 73 wherein said control member generates signals defining a monochromatic image on said electronic display.

81. (NEW) The clothing apparel of claim 73 wherein said control member generates signals defining an image composed of alphanumeric characters.

82. (NEW) The clothing apparel of claim 73 wherein said panel is sized and arranged to form part of a vest.

83. (NEW) The clothing apparel of claim 73 wherein said panel is sized and arranged to form part of a shirt.

84. (NEW) The clothing apparel of claim 73 wherein said panel is sized and arranged to form part of a cap.

85. (NEW) The clothing apparel of claim 73 wherein said panel is sized and arranged form part of a tie.

86. (NEW) The clothing apparel of claim 73 wherein said panel is sized and arranged to form a part of a pair of suspenders.

87. (NEW) The clothing apparel of claim 73 wherein said panel is sized and arranged to form a part of a belt.

88. (NEW)) The clothing apparel of claim 74 wherein said memory is replaceable.

89 (NEW). The clothing apparel of claim 73 wherein said display is composed of two-dimensional array of pixels.
